

FLEXITANK SOLUTIONS

We move your
business forward

FLEXITANK SOLUTIONS

Best in class for safety, efficiency and reliability

We bring you to your destination and beyond – with our comprehensive, modular-based networking logistics solutions along your entire supply chain. With our global network, we are personally on-site for you worldwide. We efficiently and safely transport your liquid goods to wherever they are needed.

With our flexitank logistics know-how, we offer you a customized logistics solution with global availability that is also ideal for small and medium quantities of non-hazardous chemical products and foodstuffs such as juices or wines.

Thanks to our flexitank solutions, overseas destinations are reached reliably and efficiently, no matter where. Because we are right there for you providing direct local support in Europe, Asia, the United States of America and worldwide.

We offer you full-service solutions from a single source, from the delivery, planning and implementation of transport logistics to professional disposal of the flexitank. We develop the best individual solution for all requirements that will drive your business forward efficiently. Due to our own flexitank production according to European standards, we guarantee the highest quality and reliability in material and processing.

You can count on the reliability and strong performance of the leading international logistics provider combined with the highest requirements for sustainable logistics solutions.

- Adaptable use of flexitanks in 20-foot containers reduces empty repositioning and costs
- Our own flexitank production according to the highest European standards
- Global availability

Installation of Camlock Bottom Outlet Valve
to ensure maximum discharge

FLEXITANK LOGISTICS

Our services

With our flexitank services, we offer a cost-efficient alternative for transporting mainly small- and medium-sized quantities of non-hazardous bulk chemical and foodstuffs in a standard 20-foot container.

COMPLETE WORLDWIDE SERVICE 24/7

We offer you a complete service, global and around the clock: From delivery of the empty flexitank, fittings including bulk head system and valve assembly in the container, filling, loading supervision, intermodal transport and unloading at the consignee's site, up to professional disposal of the flexitank.

FULL FLEXIBILITY FOR VARIOUS LIQUIDS

Flexitanks are suitable for the following liquids:

- Foodstuffs (kosher & halal certified): Wine, juice concentrates, edible oils, liquid sugar, beverages and many others
- Non-hazardous chemical products and processable oils: industrial oils, lubricants, glycerin, drilling muds, latex, polyols and many others

HIGH VOLUME EFFICIENCY FOR BETTER MARGINS

With flexitank solutions from HOYER, you can transport liquids efficiently and reduce empty repositionings and associated costs. Our flexitanks are available in sizes from 14 to 24 m³. This can achieve potential savings of load capacity and labor efficiency of up to 15 per cent compared to IBCs or 40 per cent compared to drums.

ALSO IDEAL FOR LONG-DISTANCE TRANSPORT

Thanks to their secure vacuum and the availability of a pro-

TECTIVE EVOH barrier, our flexitanks safeguard your sensitive liquid goods from oxidation until they are unloaded.

MAXIMUM SAFETY THANKS TO TOP-QUALITY MATERIAL

Our flexitanks meet the highest requirements for leak-tightness thanks to an inner material made of single-layer linear low-density polyethylene (1,000 microns), which is given a special additional outer coating. The robust bulkhead system of our flexitanks provides the necessary protection during transport, and prevents damage caused by the container doors.

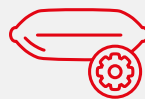

HIGHEST RELIABILITY THROUGH GUARANTEED QUALITY

Benefit from the customary HOYER quality: Our flexitanks are produced in our own factory in Malaysia according to European quality standards, and each individual tank is comprehensively tested for leaks before delivery. HOYER works according to the COA guidelines and can provide all the necessary certifications.

REDUCED CARBON FOOTPRINT THROUGH A RECYCLING CONCEPT

Flexitanks can be recycled and disposed of according to our customers' requirements and local regulations. Reutilization of the valuable material is part of the overall logistics solution.
