

Supply Chain Solutions

A large industrial robotic arm with a blue and silver body is shown in the process of filling several large, red, cylindrical Intermediate Bulk Containers (IBCs). The arm is positioned above the containers, and a clear liquid is being dispensed from its nozzle into the first container. The background is a bright, clean industrial setting with a blue wall and various pipes and cables visible.

You reach your goals with SCS

The Supply Chain Solutions (SCS) business line undertakes entire logistics processes, both in customers' plants and off-site, and develops solutions and optimisations for challenging logistics tasks. The portfolio of services comprises:

- On-site logistics
- Filling and blending services
- Intermodal terminal operations
- Dangerous goods terminal operations
- Dry-bulk logistics
- Project development

HOYER operates numerous logistics facilities in Europe. More than 700 SCS employees, with their significant know-how and high standards of safety, security and quality awareness, ensure the smooth operation of the logistics chain.

Working for you worldwide

The international logistics company HOYER is a worldwide market leader in moving liquids by road, rail and sea. Wherever they may go, HOYER will get chemicals, foodstuffs, gas and mineral oil to their destinations safely and efficiently in tank containers, road tankers, flexitanks and intermediate bulk containers (IBCs). HOYER also has numerous logistics facilities with depots, cleaning stations and workshops. Its portfolio also includes on-site logistics, filling and blending services, terminal operations, dry-bulk logistics and project development. 115 representative offices and around 6,000 employees throughout the world ensure a reliable and smooth transport process. HOYER is organised in business units that cover a variety of product and service areas and thereby always guarantee the right logistical solution for every requirement.

We optimise your processes

HOYER is the only logistics service provider in the chemical industry that offers and bundles a full range of services, creating synergies from which all customers benefit. For this, HOYER provides a tailor-made logistics infrastructure. You benefit from a broad spectrum of services, efficiently designed logistics processes and customised processing of your requirements.

On-site logistics

HOYER takes over part of your logistics and integrates itself seamlessly into your business processes with its own employees at your location. The aim of the collaboration is to optimise the quality of your on-site logistics and to minimise overall supply chain costs.

- Customised on-site logistics concepts
- Cost transparency
- Know-how of continually trained staff
- Utilisation of synergies
- Seamless integration into the plant's logistics process

Filling and blending services

HOYER fills almost every liquid chemical product in its own fully and semi-automatic filling facilities. Upon request, HOYER takes over the material directly at the production site, transports it and also manages its distribution.

- Strongly developed safety culture
- State-of-the-art filling facilities
- Comprehensive expert knowledge
- One-stop-shopping reduces interface risks

Intermodal terminal operations

HOYER constantly invests in expanding its intermodal terminal operations and is continuously enlarging the European network. In addition to its own facility in Germany, HOYER has collaborated in several intermodal terminals in Europe for a number of years.

- Short turnaround times
- Modern IT systems
- Large-scale transshipment installations
- Flexible goods flows
- On-the-spot repair facilities
- Safeguarding the cold chain

Dangerous goods terminal operations

HOYER has modern terminals available in which dangerous goods can be transhipped, stored and managed. With innovative storage and handling concepts, your products are available at any time.

- Highest possible safety and security standards
- Use of modern warehouse management systems
- Additional services such as weighing, heating, cleaning and maintenance

Dry-bulk logistics

HOYER offers customised concepts for silo logistics plants, for example bulk loading, filling into various packaging types, storage, dispatch processing and load securing as well as maintenance and repair.

- Constant availability
- Fast truck dispatch processing
- Comprehensive costs overview
- Handling by logistics specialists

Project development

HOYER develops and plans logistics activities globally for you, for example new logistics plants including the associated assets, processes and approvals, with the objective of a future operation.

- Tailor-made logistics solutions
- Competence resulting from a large number of projects
- Use of proven calculation tools
- Provision of logistics infrastructure

Our strengths are your advantages

- Many years of experience in chemical industry logistics
- Costs transparency and variable logistics costs
- Sound, financially strong and reliable family business
- Highly developed SHEQ philosophy (safety, health, environment, quality)
- Utilisation of synergies
